Weather Key Points

Regional Operations Center

Western Region

Sunday, October 16

- A few lingering showers and thunderstorms are possible across southern California today, mainly in the mountains and deserts.
 - Locally heavy rainfall is possible, but no widespread flooding concerns are anticipated today.
- Cooler temperatures will continue today before a warming trend returns Monday with temperatures peaking mid-week.
 - Sierra Nevada and southern Cascades temperatures across Northern California are expected to remain above normal through the week.
- Dry and warmer weather expected Monday through much of the week, before rain chances increase across southern California towards the end of the week and across northern California next weekend.

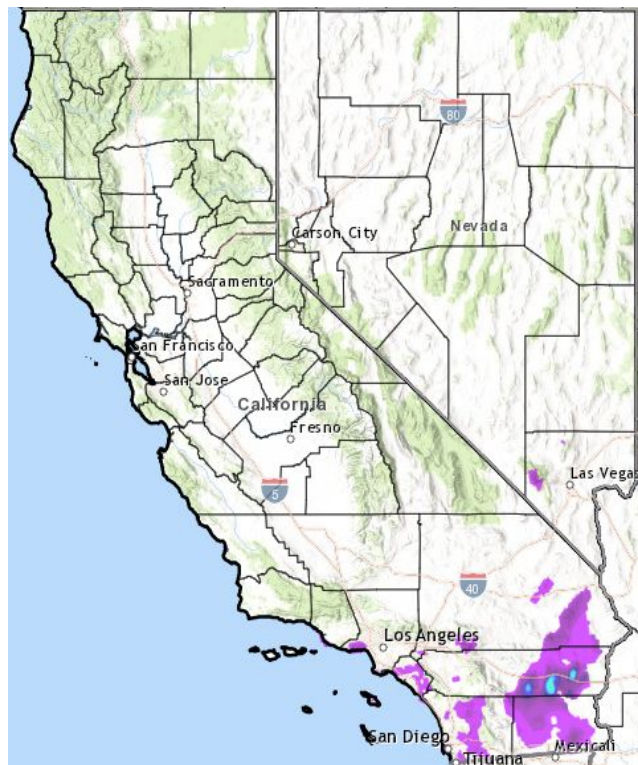

Precipitation Forecast

Regional Operations Center

Western Region

Sunday, October 16

Sunday

Monday

Tuesday

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Sunday, October 16

6-10 Day Outlook (October 21 – October 25)

Temperatures

- Above normal temperatures are favored again statewide, except for far southern California where near normal temperatures are favored

Precipitation

- Near normal precipitation is favored along the central coast areas, with above normal precipitation favored across the rest of California

8-14 Day Outlook (October 23 – October 29)

Temperatures

- Above normal temperatures are slightly favored across the northern California coast, with near normal or below normal temperatures favored across the rest of California

Precipitation

- Near normal precipitation is favored along the southern coast areas, with above normal precipitation is favored across the rest of California
